Put your data to work

Transform your data into actionable business intelligence and improve the performance of your Engineering Department with CMS Analytics.

Benchmark and improve performance

Establish baselines with your teams. Monitor and celebrate improvements over time.

The tool shows long-term trends and highlights exceptions, so that users can translate the information into impactful action plans.

Manage exceptions

Pinpoint your outliers, identify root causes and work with your teams to resolve them.

Assess and monitor metrics for productivity, backlog, turnaround time and customer satisfaction.

Allocate effectively

Ensure that your teams have the right priorities, so that time-sensitive priority work is done on time.

Promote 100% compliance

Confirm that your maintenance program is effective with insight into the reliability and compliance of your Inspection, Testing and Maintenance Programs.
